Project's list - Infosys - InStep | Internship | Projects

A truly unique experience

John Antony Keith Brown,
University of Cambridge

During my internship I worked with R&D branch of Infosys to simulate a mapping robot using a specific depth sensing camera. Because I finished this project earlier than expected, I was able to extend it to incorporate some machine learning, by trying to develop an algorithm to optimise the mapping strategy. I was really pleased to be allowed to do this since it has given an amazing opportunity to learn more about machine learning and develop my skills in that area, which I'm sure will be useful in my future career. The Instep team work around the clock to make sure that you always have someone to contact if you have a problem, and have done their very best to make the virtual experience as engaging as possible. This internship is perfect for those who want to stretch themselves, whilst gaining valuable industry experience.

InStep exceeded my expectations

Jenanie Kularajan,
King's College London

I had the pleasure to intern with Infosys Instep as a software testing engineer. Being my first internship, I was very excited to meet people from similar backgrounds and get an idea of the work lifestyle in tech. I was allocated a project based on my interest and introduced to my mentor before the internship started. My most memorable memory that I will forever cherish from this internship was the Instep Hackathon. Working for twenty-four hours continuously with my team was a crazy experience that brought all of us a lot closer. Overall, the learning experience and networking experience was unmatchable. I have made some amazing friends I will forever keep in touch with and sharped my skills. This internship was a fabulous experience that exceeded in every way and I would do it all over again!

About Infosys

Infosys is a global leader in next-generation digital services and consulting. We enable clients in 46 countries to navigate their digital transformation. With nearly four decades of experience in managing the systems and workings of global enterprises, we expertly steer our clients through their digital journey.
