

Trainee Program Mars Supply Chain Leadership Experience

Start: September 2021
Location: Verden

The **functional trainee program "Mars Supply Chain Leadership Experience"** is the perfect grounding for a career in our global supply chain. You can choose from three different pathways that equip you with the functional and leadership experiences to become a supply-chain leader of the future:

Program Description

- Three 12-month placements
- Opportunity to work abroad as one placement

What do you get?

- Lead your own projects across a globally renowned business
- Join and learn from our global alumni and graduate network
- A mentor and experienced leaders
- Competitive starting salary

What do we need from you?

- A minimum grade of 2,5 or better in a relevant Master Studies (or Masters in Engineering for Engineering Pathway)
- The right to work in the EU
- A passion for the pathway you chose

Engineering Pathway

You are a chemical, electrical or mechanical engineer with a passion for technology and people. During your trainee program you'll be responsible for your own engineering projects at different factories and will gain people leadership skills. You will have one year abroad, and in the final year you will manage your own team.

Supply Chain Pathway

In three years you'll discover different areas of our supply chain. From leading projects on the factory floor over planning our production volumes to making sure our products safely arrive at our customers. In this pathway you will develop your functional and leadership capabilities to the next level.

Procurement Pathway

You'll be involved in strategic business decisions, leading projects that are about making sure we buy the right products, driven initially by quality and at the right price. You'll make sustainability a priority and build mutual relationships with suppliers.
